Mental, physical, social and cultural development of the students.

## **Guidelines Regarding Home Work for Students**

Dear Children,

The daily home task has been planned with a view to help you in your studies and to inculcate the habit of doing assigned work regularly.

You are advised to bring this diary to school every day and note down after every period the instructions which your teachers give regarding the home task. But there is a word of caution, do not ask your parents to do the home-task for you. You may seek help or guidance only. Cultivate the habit of self-reliance and self-growth.

You should fix your hours of study at home in consultation with your teachers and parents. Remember the home-work instruction given by the teachers. Before you start work at home and try put in your best. This habit will be useful and pay you in the long run.

The calendar contains much useful information which you should note down in book and make a proper use of it. Will help you achieve your desired goal
